

How closely do the move choices match people?

Technical check: 1/1 is closest on these fixed human-opening positions.

0.0 0.1 0.2 0.3 0.4 0.5
Mean TV distance from human move choices (lower is closer)

T 0 / P 0 T 1 / P 0.95
T 0.5 / P 0.9 T 1 / P 1

Maia3-79M, 1600/1600. Same 450 human-book paths and 4,581 position comparisons; 95% trajectory-bootstrap intervals.

These filtered books cover common positions best. Later coverage is limited; this is one measure of opening fit.
